

## Auto Rubber Engine Mounting

As a professional Auto Rubber Engine Mounting manufacture, you can rest assured to buy Auto Rubber Engine Mounting from our factory and we will offer you the best after-sale service and timely delivery. All the engine mountings we produce are with durable quality and high performance to ensure the safety and comfortable for your driving.

# 1. Product Introduction of the Auto Rubber Engine Mounting

Hydraulic engine mounts are made of rubber, and they feature a hollow centre filled with hydraulic fluid, usually a glycol/water mixture. As well as supporting the engine, the mounts must absorb two main types of vibration:

Low frequency vibration that comes from shock excitation – accelerating or braking hard and driving on rough surfaces for example.

High frequency vibration that comes from unbalanced engine forces, such as from firing pulses or any mass imbalance in the rotating or reciprocal engine parts.

## 2. Product Parameter (Specification)

Product Name:	Auto Rubber Engine Mounting
Material:	NBR, HNBR, EPDM, SILICONE, VITON, FLS, FFPM, PTFE
Size:	Any size, Customized/standard and nonstandard
Color:	Black
Packing:	plastic bag&carton box or according to your requirements
Sample time:	20-25days
Application:	Automotive
Warranty:	2years

## 3. our service.

1. Inquiry about our products can be replied within 12 hours.
2. Professional & experienced staff help you solve problems of silicone and rubber products.
3. Accept customized shape, material, hardness, temperature, size, color, logo and packing.
4. Mode of production: Compression or injection or extrusion.
5. We have a comprehensive range of in-house manufacturing facilities, allowing us to provide fast and effective manufacturing.

## 4. Quality Control and Certifications

We serve our customers with high quality Customized Shape Rubber Gaskets by strictly follow ISO 9001:2015 and IATF 16949.

Dimensional Inspection

Incoming QC

In-process QC

In-process QC

In-process QC

FQC

## 5. Packing, Payment and Shipping

Our packing for all the Customized Shape Rubber Gaskets, strong enough to ensure its safety throughout the whole delivery no matter domestic or oversea shipping. Customized Packing/LOGO/Labeling are Available.

ISO 9001 : 2015

IATF 16949 : 2016

## 6. FAQ

### 1. Do you supply material?

Yes, we have our own mixing rubber factory and can supply you with Synthetic Rubbers to fit your applications.

### 2. If OEM is acceptable?

Yes, Samples are Free of charge

### 3. What Is EPDM Rubber ?

Xiamen Liangju Rubber Technology Co., Ltd.

Tel: +86-592-7255151

E-mail: Dylan@tec-rubber.com

EPDM is a synthetic rubber polymer and is made from ethylene and propylene monomers. This rubber was developed in the early 1960's and used to produce variety of products like radiator and steam hoses, freezer gaskets, tires, roofing membranes and aircraft seals to name only a few.

#### **4. Why is rubber used to produce industrial products?**

Rubber has certain unique properties which makes it suitable to produce rubber products which are widely used in various industrial applications. Rubber is water repellent. It is resistant to alkalies and weak acids. Rubber has elasticity, toughness, impermeability, adhesiveness, and electrical resistance. These properties make rubber useful as an adhesive, a coating composition, a fiber, a molding compound, as well as an electrical insulator.

#### **5. Which type of rubber is best for my application?**

There are a range of natural and synthetic rubbers with different properties, making some more suitable than others for particular applications—the key of course is choosing the most appropriate one! For specific requirements, please ask our rubber products specialists for guidance.
