

## Suspension Rubber Bushings

As a ISO and IATF certified manufacturer, we specialize in manufacturing of an extensive range of suspension rubber bushings, that are known for accurate dimension and high performance. The bushings are mounted on car suspension and steering joints to absorb road bumps, control the amount of movement in the joints and reduce noise and vibration

## 1. Product Introduction of the Suspension Rubber Bushings

As a ISO and IATF certified manufacturer, we specialize in manufacturing of an extensive range of suspension rubber bushings, that are known for accurate dimension and high performance. They're mounted on car suspension and steering joints to absorb road bumps, control the amount of movement in the joints and reduce noise and vibration. Bushings often take the form of fat, rubbery washers through which suspension components — or the bolts that attach them — pass.

Product Introduction of the Suspension Rubber Bushings:

Xiamen Liangju Rubber Technology Co., Ltd.

Tel: +86-592-7255151

E-mail: [Dylan@tec-rubber.com](mailto:Dylan@tec-rubber.com)

This suspension rubber bushings were made up with high quality rubber material with steel sleeves which can provide vibration isolation and dampening to vehicle components. The bushings provide an isolating interface between vehicle components and the chassis or frame onto which they are mounted.

Product Feature And Application:

We provide a wide range of suspension rubber bushings to our clients. Precision manufactured at our facility, these bushings are available in both metal bonded and non-metal bonded finishes. The bushings are handy in both dynamic and static conditions of usage. The bushings are mainly used for the TOYOTA, HONDA, NISSAN, MITSUBISHI, MAZDA, HYUNDAI, and others.

## 2. Product Parameter (Specification)

Product Name:	Suspension Rubber Bushings
Material:	NBR, HNBR, EPDM, SILICONE, VITON, FLS, FFPM, PTFE

Size:	Any size, Customized/standard and nonstandard
Color:	Black
Packing:	plastic bag&carton box or according to your requirements
Sample time:	20-25days
Application:	Automotive
Warranty:	2years

### **3. our service.**

1. Inquiry about our products can be replied within 12 hours.
2. Professional & experienced staff help you solve problems of silicone and rubber products.
3. Accept customized shape, material, hardness, temperature, size, color, logo and packing.
4. Mode of production: Compression or injection or extrusion.
5. We have a comprehensive range of in-house manufacturing facilities, allowing us to provide fast and effective manufacturing.

### **4. Quality Control and Certifications**

We serve our customers with high quality Customized Shape Rubber Gaskets by strictly follow ISO 9001:2015 and IATF 16949.

Dimensional Inspection

Incoming QC

In-process QC

In-process QC

In-process QC

FQC

## 5. Packing, Payment and Shipping

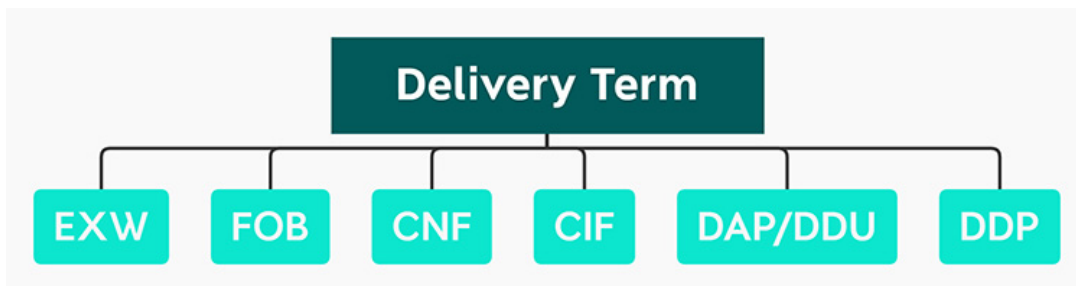

Our packing for all the Customized Shape Rubber Gaskets, strong enough to ensure its safety throughout the whole delivery no matter domestic or oversea shipping. Customized Packing/LOGO/Labeling are Available.

ISO 9001 : 2015

IATF 16949 : 2016

## 6. FAQ

### 1. Do you supply material?

Yes, we have our own mixing rubber factory and can supply you with Synthetic Rubbers to fit your applications.

### 2. If OEM is acceptable?

Yes, Samples are Free of charge

### 3. What Is EPDM Rubber ?

Xiamen Liangju Rubber Technology Co., Ltd.

Tel: +86-592-7255151

E-mail: Dylan@tec-rubber.com

EPDM is a synthetic rubber polymer and is made from ethylene and propylene monomers. This rubber was developed in the early 1960's and used to produce variety of products like radiator and steam hoses, freezer gaskets, tires, roofing membranes and aircraft seals to name only a few.

#### **4. Why is rubber used to produce industrial products?**

Rubber has certain unique properties which makes it suitable to produce rubber products which are widely used in various industrial applications. Rubber is water repellent. It is resistant to alkalies and weak acids. Rubber has elasticity, toughness, impermeability, adhesiveness, and electrical resistance. These properties make rubber useful as an adhesive, a coating composition, a fiber, a molding compound, as well as an electrical insulator.

#### **5. Which type of rubber is best for my application?**

There are a range of natural and synthetic rubbers with different properties, making some more suitable than others for particular applications—the key of course is choosing the most appropriate one! For specific requirements, please ask our rubber products specialists for guidance.
